

Slide 1

We are looking at the Business Profiles and in this session we are looking at the AP/Creditors Business Profile.

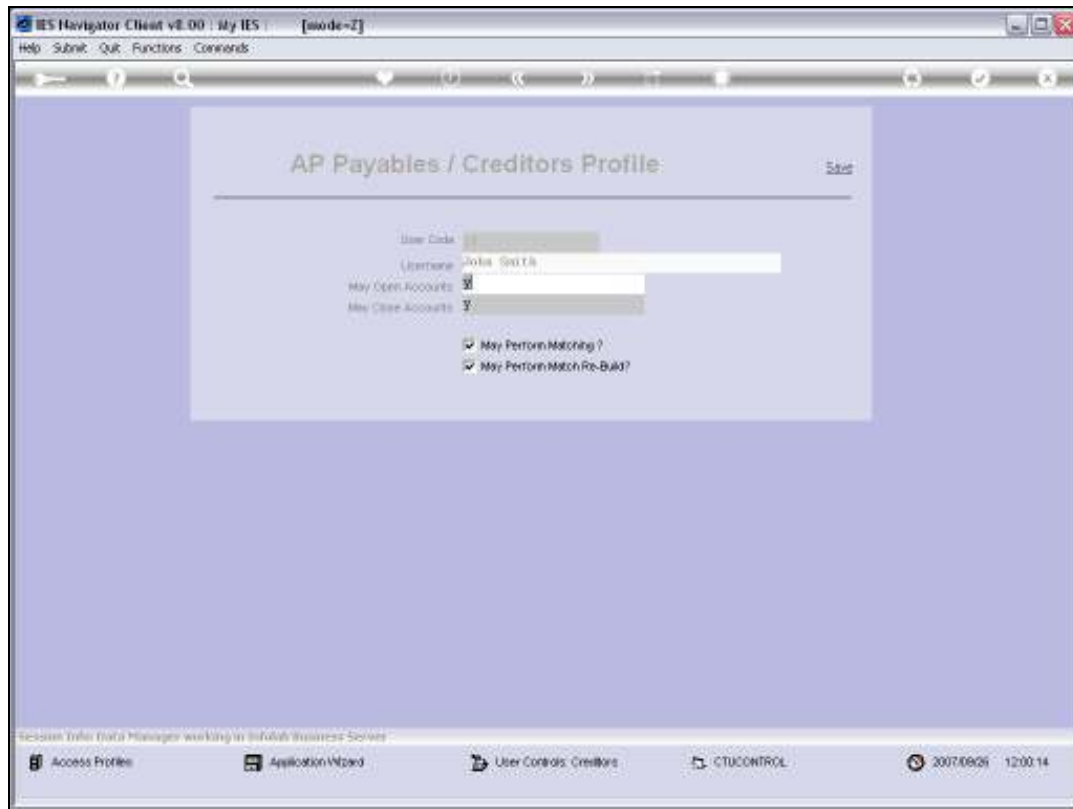

Slide 2

We can Access this Business Profile for the User, John Smith, from the User Master Record.

Slide 3

From the Business Profiles Option list, we select AP/Creditors.

Slide 4

A User who does not have an AP/Creditors Business Profile can still use the Creditors Module or Application, without any problem.

But this Profile provides for specific Privileges and if the User wants to perform any of these particular Actions, then he or she will need a Profile to list one or more of these Privileges.

What we are talking about, is specifically to open New AP/Creditors Accounts or to close any existing accounts, to perform Matching or to perform Matching Re-Build.

The User must have a Profile and must have one of the Privileges or the specific Privilege for the Action listed here.
