

Slide 2

Slide 3

From the User Master Record, we select Business Profiles and then we select Job Costing.

Slide 4

This is an easy Profile to use. A User can use the Job Costing Application based on the Menu Options that the User has on his or her Menu and only needs a Job Costing Profile if one or more of the Privileges Listed, on this Profile, is required for the User.

Basically we indicate whether the User is allowed to open New Job Costing Accounts, i.e. New Jobs, and whether the User may close existing Job Costing Accounts.

So if the User requires one or both of these Privileges, then the User will require this Business Profile. Otherwise it is not required.
